15 Million Children affected in Europe with severe visual dysfunctions!!!

152
Million children
in Europe (*)

15 (**) Million children
have **severe visual**
dysfunctions

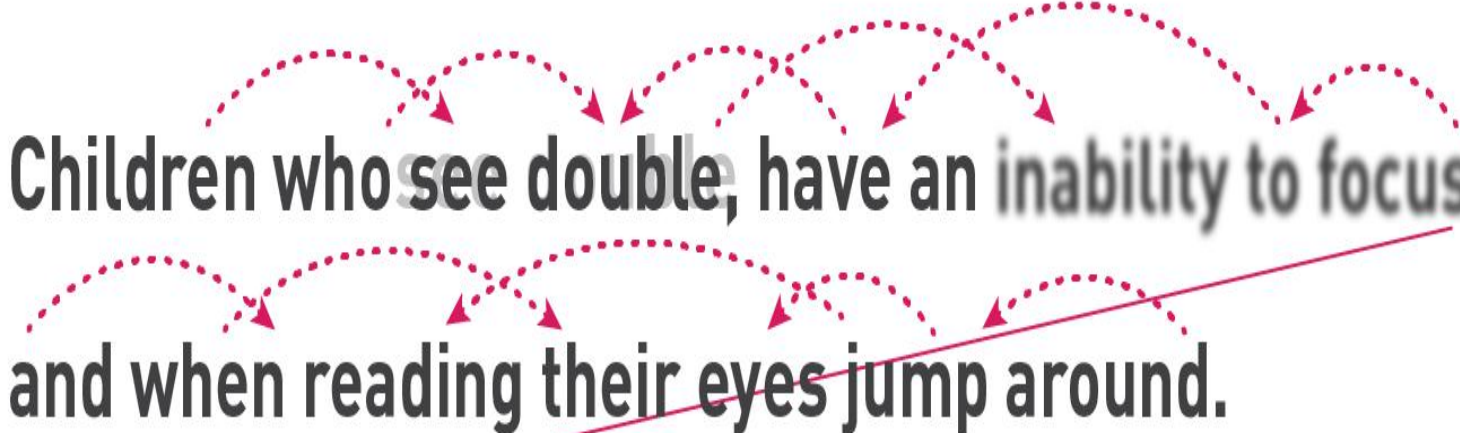

That is
1 in **10**

50%
Of those 150 million
are still **undiagnosed**

(*) **Source:**
World Health Organization Global Health

(**) **Source:**
American Academy of Optometry;
European Academy of Optometry;
British Council of Optometry.

Children who see double, have an inability to focus
and when reading their eyes jump around.

**With Visual
Dysfunctions**

Current clinical treatment solutions: Outputs take **subjective measurements** and have **low accuracy**

Cost up to
€3.500

Take
6 - 12
months

They require
at least **one 60**
minute session
per week

Services
Assesment
+
Treatment

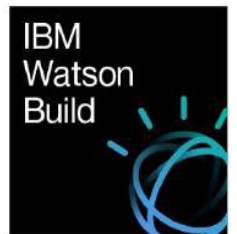

Hardware + WIVI[®] Software

Based on
AI and IBM WATSON

50+
ocular parameters and
cognitive algorithms used.
In just **20 minutes!**

EU and
PCT patent
requested

		1 year		3 months	
		60-70 minutes		20 minutes	
		Boring		Engaging experience	
		☆☆☆☆☆ Low accuracy		★★★★★ High accuracy	
		Expensive		1/10 Cost	

Subjetive and manual methodology

4 parameters
1 visual area

Depending on the
knowledge of
the specialist

**Objective measures,
an aid for the specialist**

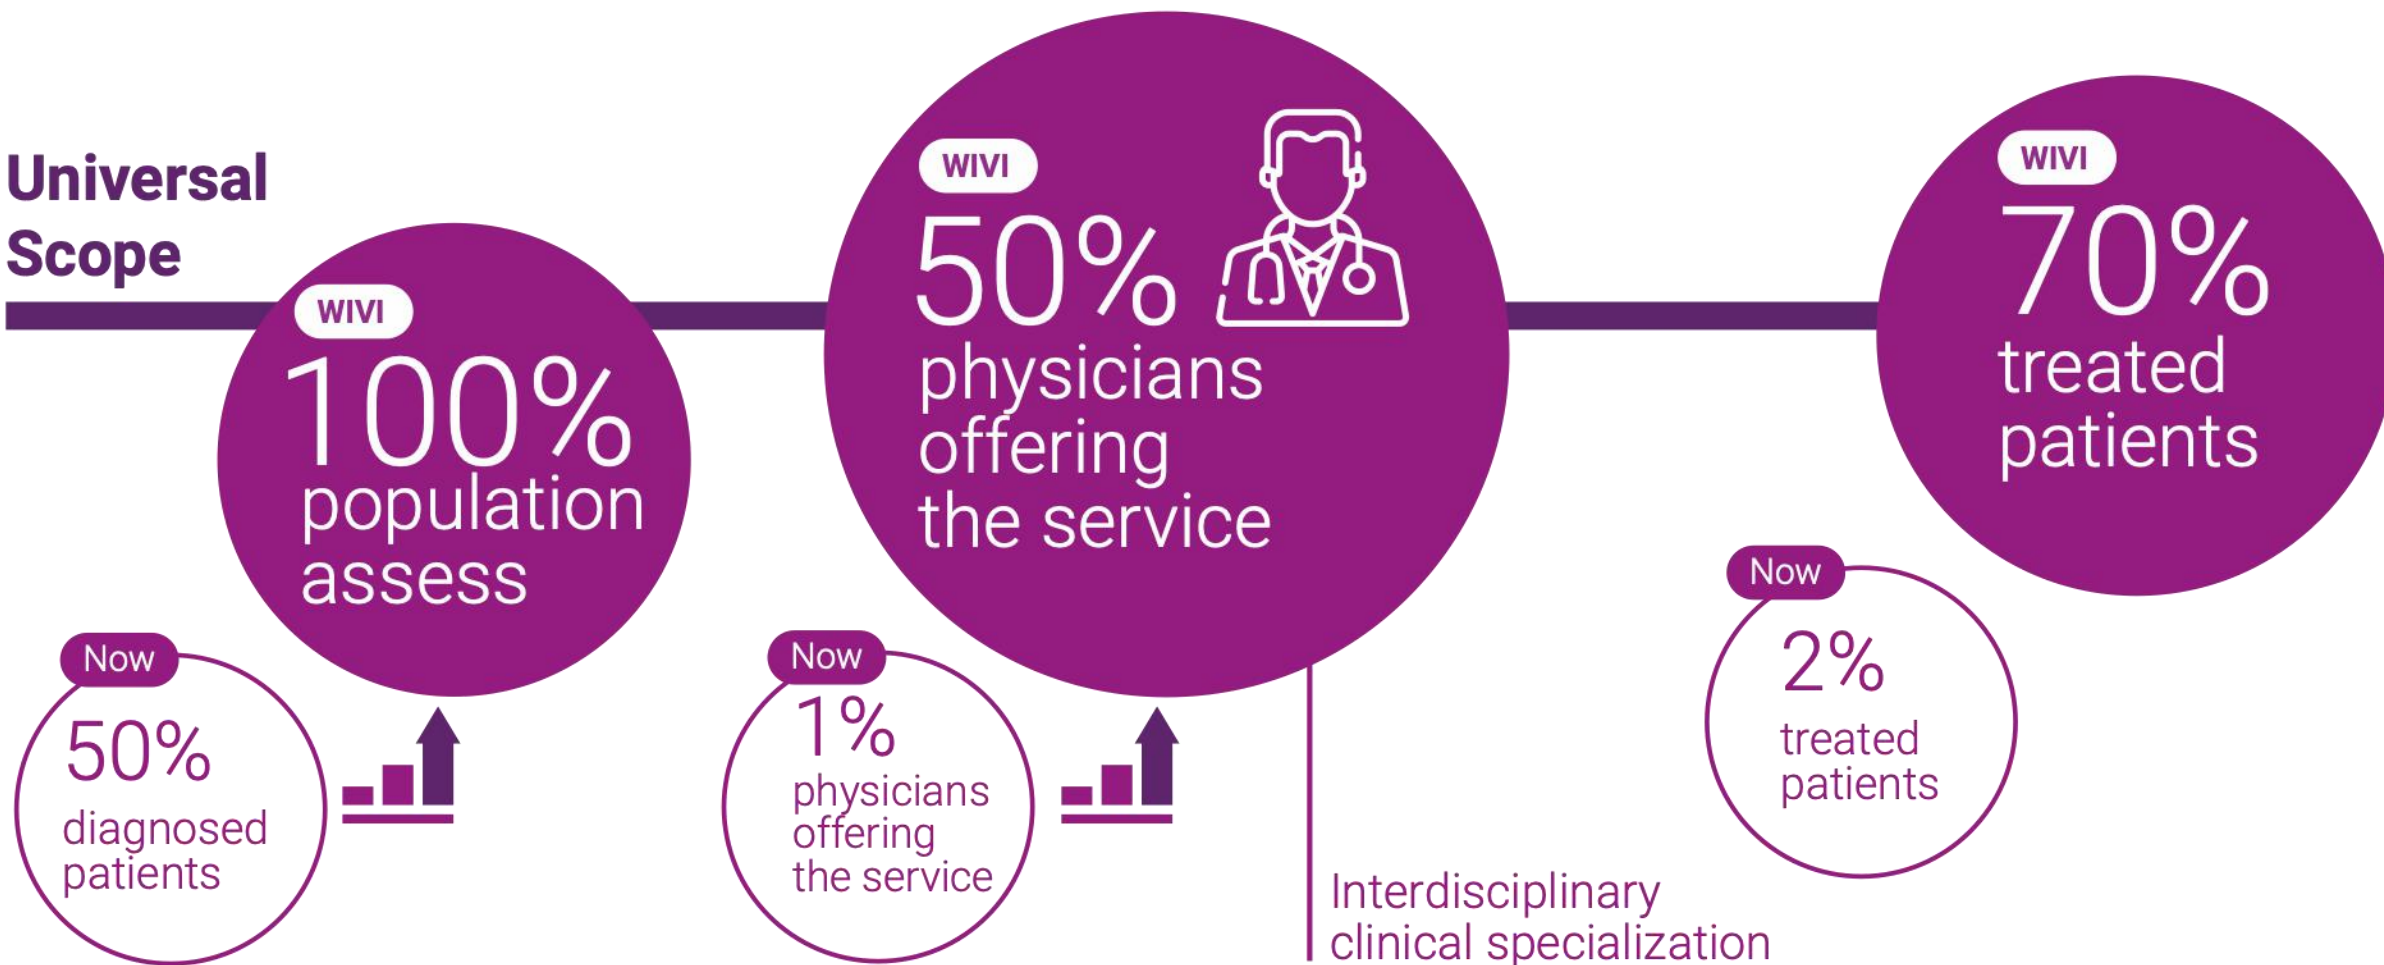

+50 parameters
5 visual areas
